

Traffic infrastructure

Road construction

Classified roads
Municipal roads
Pathways

Railway construction

Railways
Tramway construction
Industrial railways

Safety audits

Outside spaces
Open-air units

Water management

Sewerage and storm-water networks

Canalization, building re-development

Water supply plants, water works

Purification plants

Pump stations

Implementation plans for pipeline construction and plant construction

Traffic planning / Traffic engineering

Traffic surveys

Traffic studies and reporting

Traffic engineering calculations

Performance calculations

Mobility and logistics concepts

Car-park routing / sign-posting

Traffic development planning

Parking space studies

Environmental engineering

Contamination

Land management

Disposal engineering

Ground water protection

Waterbody and soil protection

Explosion-protection for pump stations

Development

Residential areas

Commercial areas

Industrial areas

Harbour areas

Urban redevelopment

Sport and recreational facilities

Public utilities

Pipeline planning

Pipeline planning

Drinking water

Gas supply

District heating supply

Power supply

Construction engineering / Structural engineering

Construction engineering

Hydraulic engineering

Support structure planning

Buildings and bridge inspection in accordance with DIN 1076

Concrete and building re-development

Hydraulic engineering

Harbours

Harbour facilities

Jetties

Wharf facilities

Flood and coastal protection

Promenades

Bank reinforcement

Building construction management / Health and safety co-ordination

Site management

Local building inspection

Project coordination

Project controlling

Health and safety planning

Health and safety co-ordination

Surveying for aboveground and underground construction

Inventory measurement

Settling and deformation measurement

Digital terrain modelling

Staking out

Building measurement

Pipeline documentation

Quantity surveys and accounting documentation

Transformation
